Joint Ventures (JVs) is increasingly becoming popular as a faster and easier approach towards implementing infrastructure and development projects at the national and local government levels. In this one-day seminar, the definition of a JV, requirements, procedures for selecting partners, opportunities and challenges, and examples of existing and prospective JV projects such as water, reclamation, public markets, bus terminals, land development, government centers, power, transport, and more shall be discussed. Participants will get soft copies of templates of actual and proposed JV ordinances.
