

BEST PRACTICES IN DIGITAL RECORD GOVERNANCE AND MANAGEMENT

FEATURING INTERNATIONAL STANDARDS IN QUALITY RECORD MANAGEMENT SYSTEM

Tuesday, Wednesday & Thursday, July 19, 20 & 21, 2022 * 1:30PM TO 4:45 PM via **zoom**

To succeed in the 21st Century data-driven business environment, a well-run organization must have an efficient system of management and governance of records.

This training will teach your governing body and executive management the global best practices and framework on how to plan, design, develop, implement and improve the end-to-end quality management system of digital records. It will include essential topics on record processing, controls, and policies that are aligned with the data privacy law.

This comprehensive lecture will be very helpful for organizations whether they are transforming from paper to digital records or simply improving their business systems. Records are valuable resources that are useful in decision-making and as evidence in any legal issue that a private company or government institution may encounter. Enroll and improve your record management system!

Course Director & Lecturer: **John Macasio** is the trainer and consultant at the Information and Communications Technology Literacy and Competency Development Bureau of the Department of Information and Communications Technology.

He has recently done capability building of management and workforce on privacy impact assessment and privacy and security management manual with the following organizations among many others:
